

HANDOUTS FROM THE SEPTEMBER 21, 2022

To: Senate Study Committee on People with Intellectual and Developmental Disabilities
and Waiver Plan Access

My loved one who has a developmental disability receives Community Access Services through Mineral Springs Center, INC. These services are very important to my loved one. My loved one has the opportunity to live a life of purpose and meaning as a valued member of the community. These services also provide respite for me as a caregiver. I am concerned about the DSP workforce crisis in GA. The DSPs at Mineral Springs Center need to be sufficiently compensated for the vital services they provide to my loved one. The average hourly wage of \$10.75 per hour is not sufficient to meet the current financial needs of an individual or family living in the north GA area.

I request that DD service rates be increased so that DSPs can make a competitive and livable wage, new recruits can be hired for the future, and no services have to be discontinued due to the lack of DSPs.

Respectfully,

Tammy Booth for Tammy Booth
